SUMMARY

Product designer who designs and builds: UX research, interaction design, UI, and front-end code shipped with AI coding agents (Claude Code). Founder & CEO of Elevare Designs since 2024, doing paid client work since 2022, across fintech, marketplaces, education and local business. Creator of Saathi, a multilingual, voice-first civic app concept in 17 languages. BCA (UI/UX Design) student at Chandigarh University, graduating 2028; UX certified by Google, Microsoft, Meta and IBM.

EXPERIENCE

- Founder & CEO | Product Designer — Elevare Designs, Chandigarh, IndiaMay 2024 – Present
- Founded a design and development studio; sole designer on every project and sole developer on the websites, from research, UX and UI to front-end code built with AI coding agents (Claude Code), hosting and deployment.
 - TradeX: designed a multi-asset trading app (stocks, ETFs, mutual funds, forex, crypto) with a market-first information architecture, a calm data-dense interface and a streamlined order flow.
 - WorkMaster X: mapped the poster and provider journeys of a two-sided services marketplace, designed a visible job lifecycle and built an interactive prototype.
 - The Knowledge Bus Global School, Mohali: structured a large CBSE school website as a child's journey from Play Way to Class XII, with admissions as a visible path rather than a buried form.
 - Birds and Blossoms, Calgary, Canada: a parent-first day-care website, designed and built remotely for an international client.
 - Foot Spa Cafe (five studios), Fashion World and Heaven's Lights: a ritual-led wellness site with online booking and booking tracking, a mobile-first salon site with one-tap WhatsApp booking, and a product catalogue where every piece opens a pre-filled WhatsApp enquiry.
 - Bravura: brand identity, logo design and packaging, applied across signage, menu, coasters and gift bags.

PROJECTS

- Saathi — one door to every government service — Creator · [saathiapp.space](#)2026 – Present
- Self-initiated concept for a multilingual, voice-first citizen app. Began with conversations with citizens in cities, small towns and villages, synthesised into four personas and ten design principles.
 - Designed an assistant that shows its plan and asks for consent before it acts (scripted in the prototype, so every answer is reviewable).
 - Runs in 17 languages across 11 scripts; models 42 government processes on real portals, plus 15 department consoles for the other side of the counter.
 - Built the Bharat Precision design system; every text colour is tested against WCAG 2.1 AA in code. Live clickable prototype and full case study online.

EDUCATION

- Bachelor of Computer Applications (BCA) — UI/UX Design — Chandigarh University2024 – 2028 (expected)
